REAL VARIABLES I MATH55003-01 – Fall 2026

REAL VARIABLES I

Fall 2026

Semester: Fall 2026

Instructor: Gennady Uraltsev

Meetings: Mo/We/Fr 9:40 - 10:30, CHPN 421

Welcome to Real Variables I, a graduate introduction to measure theory and Lebesgue integration. We will build measure and integration from first principles, study the convergence theorems that make the Lebesgue integral effective, and develop the structure of the spaces L^p.

Start here

- Syllabus: how the course works, grading, materials, and what to expect.
- Course calendar: class dates, current topics, holidays, and exams.
- Assignments: written homework, online questions, and submission policies.
- Resources: textbooks, office-hour guidance, and student-support links.
- Lecture notes: notes organized by course unit and lecture.

Please check the course calendar for holidays, University deadlines, and topic updates.
